DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10,12-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP2002019852 in view of Davis 2,129,119.

JP2002019852 shows a pack comprising a body 1, removal opening 3, lid 15 and filling opening 1, the body being tapered between a collar and a bottom section as seen in Figure 1. JP2002019852 lacks a plurality of pleats extending along a length of the body. Davis teaches the use of a container body (1), the body having a plurality of pleats extending along a length of the body as seen in Figure 1.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize Davis' teaching onto the body of JP2002019852, in order to provide a pleated container that can be collapsed axially into a very compact neat form so that practically all of its contents is extruded as taught by Davis in (col. 1, ll. 22-29).

3. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP2002019852 in view of Davis 2,129,119 as applied to claim 1 above, and further in view of Foster 3,371,812.

JP2002019852-Davis in combination as taught all the features of the claimed invention except that the lid the lid has a predetermined rupture line. Foster shows a lid (10) having a predetermined rupture line (19) (col. 2, ll. 1-16).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the lid of JP2002019852 and Davis with a predetermined rupture line as taught by Foster in (col. 2, ll. 1-16), in order to facilitate removal of the lid.

Response to Arguments

4. Applicant's arguments filed 9/16/2008 have been fully considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
